

Bow School District, SAU #67

Superintendent's Report

September 2, 2010

By the time we meet, school will have opened and there may be more to talk about. At this point, it is sort of the calm before the storm.....

Presentations:

The Educational Focus will be about the SINI plans required as part of NCLB for BES and BMS. We will go over the general provisions of the accountability law and each school will present their plans and discuss the process and the focus of these required documents.

Follow-up information:

The district LLT will present their work in progress using Curriculum Connector to both the administrative team and members of the School board program Committee. We will have an update of this program at the board meeting.

Action Issues:

A policy needs to be adopted regarding identification of Students with Specific Learning Disabilities. This policy is part of the Response to Intervention model that had been implemented in the district in the last year.

Committee Work:

Our committees should set dates to meet.

Future Issues:

Non-public Session:

The board should plan on meeting in non-public to discuss negotiations issues.
